What Makes Mountain Wildfire Different?

Evidence from the European Alps and Other Ranges

Table of contents

1 Introduction **3**
- 1.1 An emerging fire frontier in temperate mountains . . . 3
- 1.2 Why mountain fire is a distinct problem . . . 4
- 1.3 Objective, argument and the structure of this review . . . 5

2 Review Design and Scope **6**
- 2.1 Scope and inclusion rule . . . 6
- 2.2 The six-step review framework and evidence weighting . . . 9

3 Wildfire as a Natural Hazard **11**
- 3.1 Initiation: the Alpine ignition regime and its modelling . . . 11
- 3.2 Spread: fire behaviour and spread modelling . . . 13
- 3.3 Fire danger and hazard modelling . . . 15
- 3.4 Data, records and Earth observation . . . 18
- 3.5 What differs in mountains . . . 21

4 Climate, Weather and Projections **22**
- 4.1 Climatic controls on Alpine fire activity . . . 22
- 4.2 Mountain meteorology: wind systems, foehn and the thermal belt . . . 24
- 4.3 Lightning, convection and the summer ignition mode . . . 25
- 4.4 Climate projections and what they omit . . . 25
- 4.5 What differs in mountains . . . 26

5 Water, Drought and Water Use **27**
- 5.1 Drought, fuel moisture and the physiological chain . . . 27
- 5.2 Soil alteration and the limits of severity as a proxy . . . 28
- 5.3 Erosion, debris flow and sub-threshold triggering . . . 28
- 5.4 Water supply, water quality, snow and ice . . . 29
- 5.5 What differs in mountains . . . 31

6 Forest: Change, Ecology and Management **32**
- 6.1 Forest change, composition and fuel connectivity . . . 32
- 6.2 Protective function, biodiversity and the recovery window . . . 35
- 6.3 Managing for protection: silviculture, species and fuel treatment . . . 38
- 6.4 Prescribed fire, fuel breaks and post-fire restoration . . . 41
- 6.5 What differs in mountains . . . 45

7 Risk, Exposure and Vulnerability **47**
- 7.1 From hazard to risk: the missing terms . . . 47
- 7.2 Exposure: habitats, assets, people and seasonality . . . 47
- 7.3 Vulnerability of the built environment . . . 49
- 7.4 What differs in mountains . . . 49

8 Governance, Policy and Economics **50**
8.1 Suppression, preparedness and the practitioner constraint 50
8.2 Prevention: placement, early warning and integrated fire management 52
8.3 Fragmentation, harmonisation and cross-border coordination 54
8.4 The economics of Alpine wildfire 56
8.5 What differs in mountains 57

9 Discussion **59**

10 Conclusions **65**

Acknowledgements **66**

Funding **66**

Competing Interests **66**

Data and Code Availability **66**

A Search Protocol and Screening Register **66**
A.1 Counts at each step 66
A.2 What was recorded for each source 67
A.3 What the method determines about the corpus 68

B Glossary of Terms **68**
